Team ID	SWTID-2026-4326		
Project Name	Streamlining IT Procurement automating laptop orders with flow designer		

Ideation Phase — Brainstorm & Idea Prioritization Template

Brainstorm & Idea Prioritization Template:
Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

⏱️ **10 minutes** to prepare
⏰ **1 hour** to collaborate
👥 **2-8 people** recommended

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

⏱️ 15 minutes

- **Team gathering:** Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.
- **Set the goal:** Think about the problem you'll be focusing on solving in the brainstorming session.
- **Learn how to use facilitation tools:** Use facilitation superpowers to run a happy and productive session.

Define your problem statement

What problem are you trying to solve? Frame your problem as a **How Might We** statement. This will be the focus of your brainstorm.

How might we automate and streamline the IT procurement process using Flow Designer to reduce manual laptop ordering delays, approval bottlenecks, and fulfillment errors?

⚡ Key rules of brainstorming

Deter judgment Keep an open mind	**Encourage wild ideas** Think out of the box	**Build on ideas** Use "Yes, and..."	**Focus on quantity** Aim for volume first

Step-2: Brainstorm, Idea Listing and Grouping

Group Ideas

⏱️ 30 minutes

Take turns sharing your ideas while clustering similar or related notes as you go. Give each cluster a label.

👤 Nivetha

Automated Service Catalog Trigger: Trigger Flow Designer immediately upon submission of a laptop request item (RITM) from Service Portal.

Dynamic Catalog Selection: Filter available laptop specs based on employee department and role matrix automatically.

👤 Yuvasri j

Multi-Tier Approval Routing: Auto-route requests to Manager and Procurement Team using parallel Flow Designer decision branches.

Approval Reminders: Send automated Slack/Teams notifications and SLA escalation if unapproved after 24 hours.

👤 Yuvashri sp

Vendor API Integration: Connect Flow Designer REST actions directly to vendor stock APIs (Dell/HP) for automated order placement.

Real-time Stock Check: Validate inventory availability before generating PO to prevent backorder delays.

👤 Racshana

Automated Asset Tagging: Auto-create Configuration Items (CI) in ServiceNow CMDB when supplier sends serial numbers.

Status Dashboard Sync: Update live order tracking status for users on the Self-Service Portal.

👤 Chudarshana sree

Zero-Touch IT Provisioning: Integrate flow with MDM (Microsoft Intune) to auto-assign software profiles upon device delivery.

Automated Delivery Confirmation: Request digital sign-off from user via notification to close IT ticket automatically.

📌 Tip for Grouping Clusters:

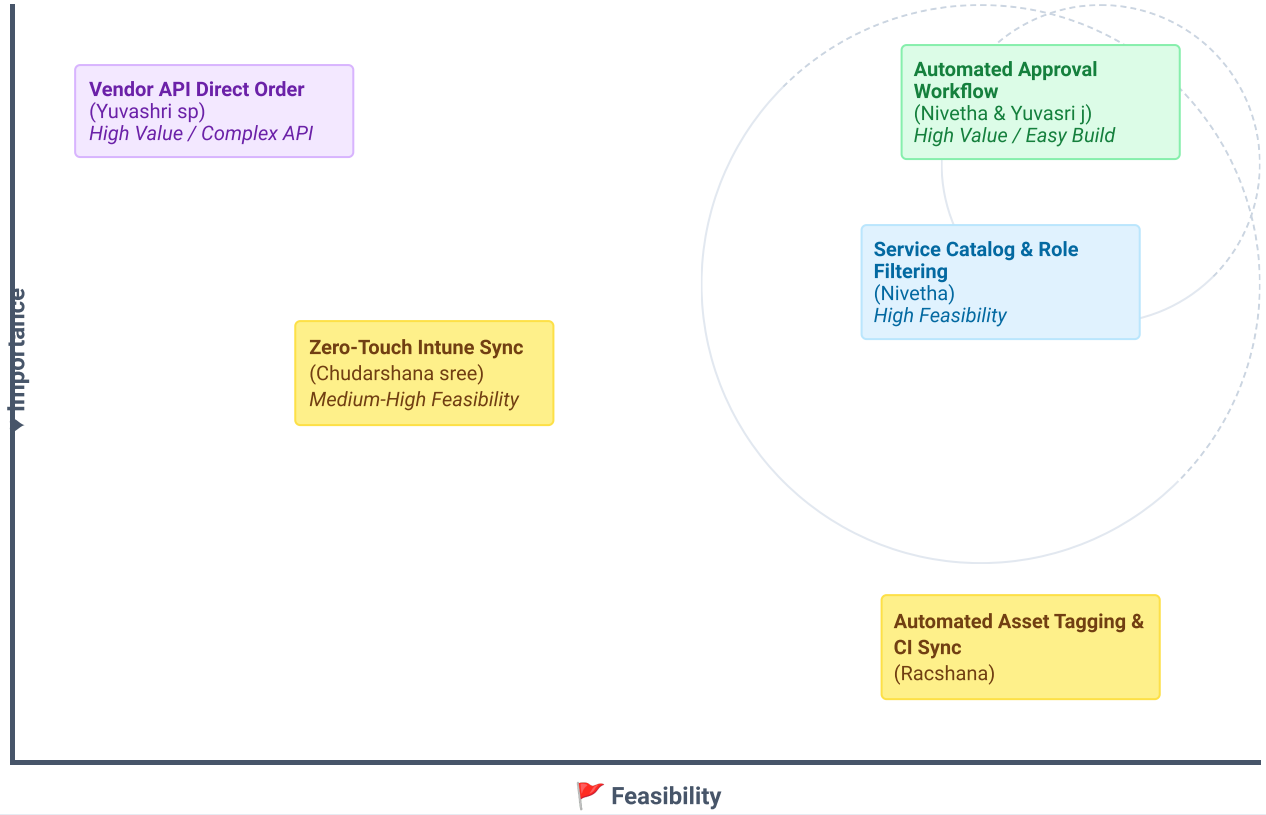

Add a prominent title or sticker next to clusters (e.g., *"Approvals"*, *"Vendor Integration"*, *"Asset Management"*) and categorize important ideas to prepare for prioritization.

Step-3: Idea Prioritization

Prioritize

⏱️ 20 minutes

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

💡 **Tip for Prioritization:** Remember to move sticky notes relative to each other when comparing on the grid. The top-right quadrant represents quick wins with maximum impact for streamlining laptop procurement.
