CUSTOMER JOURNEY MAP

Automating IT Laptop Procurement via ServiceNow Flow Designer (Designer's Lens)

Project Team:
Racshana, Chudarshana Sree, S.P. Yuvashri, Nivetha, J.Yuvasri

SCENARIO Requesting & Provisioning Workstation	1. ENTICE How does the user discover or realize the need for automated procurement?	2. ENTER What do users experience when starting the laptop ordering process?	3. ENGAGE What occurs during active request submission & automated approvals?	4. EXIT How does the user complete fulfillment & receive hardware?	5. EXTEND What post-delivery support & ongoing feedback loops exist?
1. STEPS User tasks & actions	**Discovery** Reads onboarding guide; learns about automated IT self-service portal.	**Portal Access** Navigates to hardware catalog; searches for laptop configurations.	**Configure & Submit** Selects spec bundles, fills mandatory fields, submits via Flow Designer.	**Receive & Unbox** Receives device package, unboxes pre-configured laptop, powers on.	**Feedback & Care** Completes satisfaction survey; accesses self-help IT portal for updates.
2. INTERACTIONS Touchpoints (People, Places, Things)	• **People:** HR Lead, Hiring Manager • **Places:** Onboarding Email Hub • **Things:** Welcome PDF, Catalog Link	• **People:** Peer advisors • **Places:** Service Portal Web/Mobile • **Things:** Search Bar, Spec Comparison UI	• **People:** Approving Manager, IT Admin • **Places:** Flow Designer Workflow • **Things:** Order Form, Trigger Rules	• **People:** Delivery Courier, Asset Mgr • **Places:** Office Desk / Home Address • **Things:** Track Package UI, Laptop Box	• **People:** Helpdesk Agent, Team • **Places:** IT Support Portal • **Things:** Survey Widget, Warranty Hub
3. GOALS & MOTIVES Primary user motivation	**Clear Direction** Needs quick access to official hardware channels without asking around.	**Informed Choice** Wants to pick specs tailored to role (Developer vs Manager) effortlessly.	**Zero Hassle** Desires instant automated route without back-and-forth approval emails.	**Timely Readiness** Expects laptop delivered before Day 1 to avoid onboarding downtime.	**Long-term Peace** Wants effortless maintenance, auto-updates, and accessible support.
4. POSITIVE MOMENTS UI/UX Delights & Wins	**Role-Based Banner** Smart portal greeting dynamically shows role-recommended hardware options.	**Side-by-Side Cards** Intuitive visual spec comparison prevents choice fatigue and ordering errors.	**1-Click Auto-Approval** Flow Designer triggers automatic approval for standard baseline models.	**Live Stepper Widget** Visual progress bar (Ordered → Approved → Dispatched) reduces anxiety.	**Zero-Touch Setup** Autopilot enrollment automatically installs software on first login.
5. NEGATIVE MOMENTS UI Friction & UX Pain Points	**Catalog Ambiguity** Jargon-heavy technical specs cause confusion for non-technical users.	**Form Redundancy** Manually entering Cost Center and Manager details already in HR system.	**Silent Bottlenecks** Custom spec requests stall silently without notify reminders to managers.	**Tracking Gaps** No courier tracking link provided once item leaves internal IT warehouse.	**Static Feedback** Generic 5-star rating email sent before user even powers on device.
6. OPPORTUNITIES UX Enhancements & Innovation	**Smart Questionnaire** Implement a 2-question wizard: *"What is your role?"* to auto-select bundle.	**HR Data Auto-Fill** Bi-directionally sync ServiceNow with Workday to pre-fill all user attributes.	**Nudge & Auto-Escalate** Add automated Teams bot reminders and 24hr auto-approval SLAs in Flow.	**SMS / WhatsApp Tracking** Integrate webhook alerts with courier APIs for real-time delivery maps.	**Contextual In-App Rating** Trigger micro-feedback directly during initial OS setup completion.
