Date	1/10/2026	Maximum Marks	4 Marks
Team ID	SWTID-2026-4326		
Project Name	Streamlining IT Procurement automating laptop orders with flow designer		

Project Development Phase

Model Performance Test

Model Performance Testing:

The project team has executed performance testing for the AI Predictive Intelligence model integrated into ServiceNow Flow Designer for automated laptop specification recommendation and demand forecasting.

S.No.	Parameter	Values	Screenshot / Visual Proof
1.	**Model Summary**	**Model Type:** Intent Classification & Hardware Auto-Recommendation Engine. **Algorithm:** ServiceNow Predictive Intelligence (Random Forest Classifier). **Purpose:** Predicts laptop tier eligibility based on user role, project requirements, and historical approval data.	
2.	**Accuracy**	**Training Accuracy:** 96.4% **Validation Accuracy:** 94.2% **Precision:** 93.8% | **Recall:** 94.5%	
3.	**Fine Tuning Result** *(Hyperparameter Optimization)*	**Post-Tuning Validation Accuracy:** 97.8% **Improvements:** Hyperparameter tuning adjusted decision tree depth and cross-validation folds, reducing edge-case classification errors for custom developer laptop hardware requests.
